AirOil®: Field Trials (broiler)

Treatment effect in infectious bronchitis infected farm. Each line represent mortality rate reported daily in separate rearing units in the farm. Treatment with AirOil® started at day 0 and continued for 4 days. Death rate at 0 day represents that baseline of death before treatment.

AirOil®: Field Trials (layers)

Treatment effect in layer farm affected with CRD and AI (H9N2). Each line represent daily mortality rate in separate rearing units. Treatment with AirOil® started at day 0 and continued for 4 days.
